PROJECTS

Wander Lust

🔗 Link

- WanderLust is a full-stack Airbnb clone built solo during my full-stack learning journey, featuring authentication, listings, reviews, cloud uploads, and map integration.
- Developed during my journey with Node.js, Express, MongoDB, and EJS.
- Core Features: Auth (Passport.js), listing management, Cloudinary image uploads, Mapbox maps, and responsive UI.

Attendance Calculator

🔗 Link

- Web-based tool to calculate required lectures for target attendance
- Built using HTML, CSS & JavaScript Helps students plan lectures to meet attendance goals
- Clean UI with real-time result updates

Spotify Clone

🔗 Link

- Built using HTML & CSS only
- Clean and responsive UI designed with modern layout principles
- Visually appealing frontend replica of Spotify's interface
